

What is claimed is:

1. A vehicle air conditioner comprising an air outlet, wherein airflow from the air outlet can be controlled to directly lower the temperature of the interior equipment before a driver enters a vehicle.
5
2. A vehicle air conditioner of claim 1, wherein the air outlet is placed on the interior equipment.
3. A vehicle air conditioner of claim 1, wherein the air outlet is placed against the interior equipment.
10
4. A vehicle air conditioner of claim 1, wherein the interior equipment is an instrument panel, a steering wheel or a seat.
5. A vehicle air conditioner of claim 1, comprising a timer wherein an air-conditioner operation time is controlled based on the set time of the timer.
15
6. A vehicle air conditioner of claim 1, comprising a temperature sensor wherein an air-conditioner operation time is controlled based on a temperature obtained by the temperature sensor.
20
7. A vehicle air conditioner of claim 6, wherein the temperature sensor is a sensor used in a regular air-conditioning system or a climate control system.
8. A vehicle air conditioner of claim 1, wherein the airflow is stopped or is changed to a regular air conditioning system airflow when the driver is in the vehicle or the engine starts.
